

## NOTICE TO INSTALLERS

Use **MUST** be made of the fixing screw provided, to secure the cylinder in the Lock Case.

On cylinder operated mortice locks the cylinder is always assembled to the lock case after the case has been fixed in the door. Incorrect alignment of the cylinder can lead to difficulty in operation and accelerated wear.

Sufficient clearance must be allowed around the cylinder body for it to freely take up its correct position in the lock case when held in position by the cylinder fixing screw.

## LOCK CASE TEMPLATES

Please ensure correct template has been selected before proceeding to cut door.

### INSTRUCTIONS FOR REVERSING LATCH BOLT
